Frontend developer focused on shipping clean, responsive web and mobile interfaces. Experienced with React and Flutter, with production apps live on Google Play. Final-year IT student at Ghana Communication Technology University.

EXPERIENCE

Greenbrain Technology Frontend Developer

June 2026 — Present

- Build and ship production frontend interfaces for web and mobile products.
- Collaborate with the team to deliver polished UI flows, API-connected screens, and Play Store releases.
- Contribute to products including Autobus and Nexus Asset Management.

St. Francis Xavier Hospital IT Intern · Server Room

Feb 2025 — Mar 2025

- Completed a one-month internship supporting hospital IT operations in the server room.
- Gained practical exposure to infrastructure, systems support, and real-world IT environments.

PROJECTS

Autobus

Frontend Developer · Flutter

- Built the mobile app frontend for an AI-powered business automation platform for African enterprises.
- Implemented UI flows for onboarding, operations, and day-to-day business tasks; shipped on Google Play.

Nexus Asset Management

Frontend Developer · Flutter

- Developed the Flutter frontend for a field-ready asset management app (dashboard, asset detail, modules, sign-in).
- Connected screens to backend APIs for live asset data, tracking, and operations; published on Google Play.

EDUCATION

Ghana Communication Technology University BSc Information Technology · Final-year student

Expected 2026
